GURUCHARAN TANNEERU, PMP®

AI IMPLEMENTATION | TECHNICAL PROGRAM MANAGEMENT | API INTEGRATIONS

Vijayawada, Andhra Pradesh, India • +91 7995162550 • guru.charan.tanneeru@gmail.com • gurucharan.dev • linkedin.com/in/gurucharan-dev

PROFESSIONAL SUMMARY

PMP®-certified technology professional specializing in **B2B client implementation**, **technical program management**, and **AI/API workflow solutions**. Proven track record of translating complex client requirements into scalable digital architectures, governing end-to-end delivery lifecycles, and driving user adoption across enterprise and SaaS environments.

- **Client Implementation & Onboarding:** Lead client discovery, workflow mapping, and post-sales delivery across enterprise business units and external client organizations; establish structured delivery governance, UAT milestones, and go-live readiness.
- **API & Systems Integration:** Architect and deploy robust REST API integrations, webhooks, automated payment reconciliation (Razorpay), and enterprise collaboration workflows across Smartsheet, JIRA, and Confluence.
- **AI Solutions & Workflow Automation:** Hands-on implementation of enterprise document intelligence (OCR/classification), Gemini API integrations, and accelerated prototyping using Google Antigravity and Claude Code.
- **Executive Communication & Alignment:** Bridge technical and non-technical stakeholders by translating complex architectural decisions, API constraints, and data flows into clear business outcomes and actionable executive visibility.

TECHNICAL & IMPLEMENTATION CAPABILITIES

Client Implementation & Delivery: Requirements Discovery, Client Workflow Mapping, Solution Architecture, User Onboarding, UAT & Go-Live Governance

Program Management & Governance: PMP® Methodologies, Milestone & Scope Tracking, Cross-Functional Coordination, Risk & Dependency Management

API & Systems Integration: REST APIs, JSON, Webhooks, Razorpay, Signature Verification, Automated Reconciliation, External Services

AI Implementation & Automation: Gemini API, Document Intelligence (OCR), AI Prototyping, Google Antigravity, Claude Code, MCP Integrations

SaaS & Collaboration Platforms: Smartsheet (Control Center, Dynamic View, Data Shuttle, WorkApps), JIRA, Confluence, GitHub

Data, Analytics & Databases: SQL, MySQL, MongoDB, pandas, Alteryx Designer, Excel Modeling, Data Validation & Reconciliation

Application Development: JavaScript, React, Node.js, Python, Java, Spring Boot, HTML5, CSS3, PM2 Process Management

Client Support, QA & Diagnostics: Functional UAT, API Diagnostics, Health-Check Endpoints, Production Troubleshooting, Stakeholder Enablement

PROFESSIONAL EXPERIENCE

Technical Program Manager — General Electric (GE) | Consultant – PERSOL INDIA — June 2025 – March 2026

- Led enterprise technology implementation initiatives by translating business unit requirements into technical workflows, solution delivery plans, and client adoption roadmaps.
- Partnered with internal client stakeholders and cross-functional teams across three global regions to align priorities, manage delivery dependencies, resolve blockers, and maintain implementation momentum.
- Bridged technical and non-technical audiences by translating complex AI document intelligence and API capabilities into clear business outcomes, operational dashboards, and executive updates.
- Supported enterprise document intelligence, document-processing, and reporting initiatives by aligning business requirements with workflow automation, data validation, exception handling, and dashboard capabilities.
- Coordinated implementation across eight business unit stakeholder groups, facilitating structured communication between business, engineering, and operational teams.
- Spearheaded reporting and data-validation improvements that contributed to a reported 30% improvement in reporting accuracy.
- Tracked implementation milestones, delivery risks, scope dependencies, and SLA compliance to support on-time rollouts and proactive escalation.
- Established implementation governance, status reporting, and onboarding documentation for geographically distributed business units.

Data Analyst — General Electric (GE) | Consultant – PERSOL INDIA — March 2024 – May 2025

- Configured and maintained enterprise data workflows, operational dashboards, and reporting solutions to support business analysis and decision-making for business unit clients.
- Automated recurring data preparation, validation, and reporting activities, contributing to a reported 80% automation of applicable project activities.
- Collaborated with eight internal client groups to gather reporting requirements, validate outputs, and standardize operational data across platforms.
- Supported process improvements that contributed to a reported 20% improvement in delivery efficiency.
- Worked with distributed teams across three time zones to coordinate implementation requirements, investigate data discrepancies, and maintain delivery continuity.
- Standardized data-handling and reporting activities to reduce repetitive manual work and improve output reliability.
- Prepared recurring reports and communicated relevant findings to support operational reviews and stakeholder discussions.

Data Analyst — Individual Contractor — General Electric (GE) — May 2023 – February 2024

- Supported enterprise data analysis and reporting implementations, focusing on data accuracy, operational consistency, and client workflow improvements.
- Analyzed existing processes across business units to identify repetitive manual activities and opportunities for workflow automation.
- Implemented data-validation and reconciliation practices to improve the consistency and reliability of reporting outputs.
- Contributed to a reported 40% reduction in manual process inefficiencies through process improvements and automation.
- Improved reporting workflows, contributing to a reported 30% reduction in reporting turnaround time.
- Coordinated with internal clients across distributed teams to clarify data requirements, investigate discrepancies, and deliver reporting outputs.

SELECTED ENTERPRISE PROJECTS — GENERAL ELECTRIC

1. G-EDI — Global Enterprise Document Intelligence Engine

AI-Powered Document Classification, Extraction & Compliance Validation

Role: Project Management | Business Analysis | Development Contribution

- Contributed to an enterprise document intelligence initiative focused on document classification, metadata extraction, and compliance validation.
- Supported workflows for extracting structured information, including metadata and date-related information, from unstructured documents.
- Contributed to automated validation processes designed to identify inconsistencies and improve data integrity.
- Worked on requirements and workflow considerations for processing documents across multiple jurisdictions and handling varied document formats.
- Supported the alignment of document-processing capabilities with operational and compliance requirements.
- Contributed to initiatives intended to reduce manual document review and improve processing consistency.

Technologies and concepts: Python, Node.js, OCR, OpenCV, machine learning, document classification, metadata extraction, validation workflows.

2. Chronos Intelligence Node (CIN) — AI Date Intelligence System

Intelligent Date Extraction, Normalization & Validation

- Contributed to an AI-powered date intelligence initiative focused on extracting and interpreting date information from PDFs, images, and other document formats.
- Supported workflows for extracting dates, normalizing date formats, and resolving date information using surrounding document context.
- Contributed to validation and anomaly-detection workflows intended to identify inconsistent or ambiguous date values.
- Helped align document-processing requirements with downstream data-quality and operational needs.
- Supported the broader goal of reducing manual extraction and validation effort through intelligent document workflows.

Technologies and concepts: Python, OCR, EasyOCR, Tesseract, date normalization, contextual extraction, anomaly detection.

3. Enterprise Data Automation & Dashboard Suite

Operational Reporting, Data Quality & Process Improvement

- Supported the development and improvement of reporting workflows and dashboards for enterprise operational visibility.
- Worked on data validation, reconciliation, and reporting processes to improve consistency and reliability.
- Identified repetitive activities and opportunities for automation to reduce manual effort.
- Coordinated reporting requirements with stakeholders and supported improvements to delivery efficiency and reporting turnaround time.

Technologies: Smartsheet, Alteryx, Excel, SQL, data workflows, dashboards, reporting automation.

VOLUNTEER EXPERIENCE

Chapter Webmaster — PMI Pearl City Chapter Hyderabad (PMIPCC)

December 2025 – Present

Chapter Website: https://pmi-pcc.org/ • **AI & Agile Conference 2026:** https://ac26.pmi-pcc.org/

Led end-to-end client solution delivery for PMI Pearl City Chapter (PMIPCC) as lead technical implementation consultant. Translated chapter leadership requirements into production-ready digital platforms covering member registration, payment gateway integration, administrative workflows, and post-launch client enablement.

CLIENT SOLUTION ARCHITECTURE & BACKEND DEPLOYMENT

- Implemented the AI & Agile Conference 2026 registration and event management platform covering database design, backend services, payment integration, administrative functions, ticketing, and production deployment.
- Developed MySQL database structures, database access logic, connection pooling, and a JSON-based fallback mechanism to support application reliability.
- Deployed and maintained the conference application using a React frontend, Node.js backend, PM2 process management, and server-level configuration and optimization.

SECURE PAYMENTS & REGISTRATION INTEGRATION

- Integrated Razorpay using server-side order creation, payment signature verification, webhooks for payment status updates, and reconciliation workflows for cases where payments succeed but users do not return to the application.
- Developed diagnostic and reconciliation scripts, health-check endpoints, and automated tests to investigate payment synchronization, database connectivity, email delivery, and production reliability.

EVENT OPERATIONS & ADMINISTRATIVE MANAGEMENT PORTAL

- Built an administrative portal with role-based access control, registration and revenue analytics, attendee management, CSV exports, speaker and agenda management, promotional codes, and QR-based attendee check-in.
- Automated PDF ticket generation with QR codes, email delivery with PDF attachments, ticket resending, and Telegram notifications for confirmed registrations.

AI CHATBOT INTEGRATION & CLIENT ENABLEMENT

- Integrated the Gemini API chatbot into the chapter website to provide an AI-enabled conversational experience for members and conference attendees.
- Provided chapter leadership and event organizers with technical onboarding, platform troubleshooting, operational diagnostics, and system documentation.

KEY IMPLEMENTATION HIGHLIGHTS

- Automated the registration workflow from verified payment through ticket generation and email delivery.
- Implemented payment verification and reconciliation controls to reduce reliance on unverified client-side responses.
- Enabled QR-based ticket validation and attendance recording to streamline event check-in.
- Provided organizers with administrative tools for registration visibility, attendee management, exports, and event operations.

ADDITIONAL EXPERIENCE

Independent Consultant | Freelance — AI & Digital Solutions March 2026 – Present

- Deliver custom digital solutions, application prototypes, and AI-enabled workflows for external clients based on specific business and operational requirements.
- Accelerate client application development, API integration testing, and issue remediation using Google Antigravity and Claude Code.
- Architect Gemini API and MCP-based integrations to connect intelligent AI capabilities with external client software and databases.
- Implement REST API integrations, structured JSON pipelines, relational database schemas, and verification testing across client deliverables.
- Manage the complete solution lifecycle from client discovery and prototyping through technical validation, deployment, and handoff.

** Independent client consulting is listed separately from formal enterprise employment. The PMIPCC conference platform implementation is documented under Volunteer Experience.*

EARLIER EXPERIENCE

Developer Intern — Dhanekula Institute of Engineering and Technology February 2023 – April 2023

- Contributed to the development of a college administrative system, translating functional requirements into application features.
- Supported web development, data handling, and application testing.
- Worked on a college project involving digital payment gateway functionality.

Junior Developer Intern — PinkMoon Technologies Pvt. Ltd. August 2022 – January 2023

- Supported web application development, including user interface implementation and backend functionality.
- Worked on e-commerce features and search-related functionality.
- Assisted with application testing, debugging, and iterative improvements.

CERTIFICATIONS

Project Management Professional (PMP®) — Project Management Institute 2026

Microsoft Certified: Azure Data Engineer Associate — Microsoft 2023

Google IT Automation with Python Professional Certificate — Coursera 2024

Alteryx Designer Core — Alteryx 2024

AWS Academy Graduate — Cloud Architecting — Amazon Web Services 2021

EDUCATION

Bachelor of Technology (B.Tech) — Computer Science and Engineering
Dhanekula Institute of Engineering and Technology | Jawaharlal Nehru Technological University
